資訊工程學系 / CSIE National Taiwan Normal University Taipei, Taiwan

About Me

Freshman majoring in Computer Science at NTNU, interested in DevOps, backend development, and game development. Enjoy building experimental tools with vibe coding and deploying them on cloud platforms. Actively using GitHub Student Developer Pack (GitHub, Azure, VS Code, Notion, Termius) to accelerate development workflows.

Interests

DevOps · Backend · Game Development · Cloud Infrastructure · AI Tooling

Education

National Taiwan Normal University 2024 – 2028
資訊工程學系 / *B.S. in Computer Science & Information Engineering*

Relevant Coursework

計算機網路	*In Progress*	資料庫理論	*In Progress*
演算法	*In Progress*	資訊安全	*Completed*

Experience

NTNU 資工系系學會 2024 – now
會員代表 *(Student Council Member Representative)*

- Reviewed departmental budget proposals and audited financial settlements
- Participated in amending the student association bylaws

Projects

All-Platform-Post GitHub
Cross-platform posting tool — Azure Static Web App, GitHub Actions CI/CD

- Experimental vibe-coding project for unified cross-platform post management
- Deployed as Azure Static Web App with automated CI/CD via GitHub Actions
- Tools: Azure Static Web Apps, GitHub Actions, Docker

openclaw Docker Deployment
Self-hosted AI agent deployment

- Deployed openclaw AI agent via Docker for local self-hosted execution
- Tools: Docker, openclaw

程設二專題 (Programming II Final Project) GitHub
Terminal-based application — Team collaboration

- Developed a TUI (Terminal User Interface) application as a team final project
- Tools: C, TUI

NoOodle itch.io | GameJam
Indie game developed during a GameJam event

- Designed and implemented a complete game within a limited timeframe
- Team of 5: CBC210, Fizzy143, superUserDo, Ray05202006, freEZeT29276632
- Tools: Godot Engine, GDScript

Technical Skills

- **Programming:** C, Python
- **Database:** SQL

- **Dev Tools:** Git, VS Code, Linux, Termius
- **Cloud & DevOps:** Azure (Static Web Apps), Docker, GitHub Actions
- **Networking:** Tailscale
- **AI Tools:** Claude Code, GitHub Copilot CLI
- **Productivity:** Notion, TradingView
- **Student Pack:** GitHub, Azure, VS Code, Notion, Termius
